Project Description

Topic: COVID-19 effect in Italy

Dataset: https://www.kaggle.com/sudalairajkumar/covid19-in-italy#covid19_italy_region.csv

Description:

I am planning about doing an analysis for the effect of COVID-19 in Italy. The analysis will be of a **10-page formal report**. Right now, the website source for the second data source is not decided but will use both the csv and web format file for the analysis to analyze number of deaths, positive cases, and recovered patients. For the extension of the plan, I am thinking about also including the environmental effects in the country and other major aspects which were changed in past months.
